PVAAS

What's New in 2023

Redesign of Student Reports

Student reports, which include student testing history, projections, and demographics displayed in customized data tiles, have been updated with additional content and a user-friendly interface. The Student report desk reference in the PVAAS Virtual Shelf provides detailed information about this redesigned report and how to navigate new click paths.

District and School Value-Added Updates

The 2022-23 reporting enables users to compare up to 10 LEAs/districts or schools on the District and School Value-Added report. Users also have the option to download their district and school value-added data directly from this report.

Teacher Value-Added Composite Updates

The 2022-23 reporting includes one-year and two-year composites for Teacher Value-Added reports.

Scatterplot Updates

For users with access to Teacher Summary reports, Scatterplots include 2022-23 Teacher growth data. This report enables you to create graphs that display the relationship between two metrics, such as growth and achievement, to view student learning patterns in LEAs/districts, schools, or classrooms.

District and School CDT Value-Added Reporting Updates

The 2022-23 LEA/district and school value-added reporting for all CDT assessments is calculated using the predictive methodology.

Removal of PVAAS Reports

With the 2022-23 reporting release, the following reports have been removed from the PVAAS website as their functionality is now part of the LEA/District and School Value-Added and Diagnostic reports:

- District and School Launchpad report
- District and School Value-Added Summary report
- District Quintile Diagnostic Summary and District Performance Diagnostic reports
  - School Quintile Diagnostic Summary and School Performance Diagnostic reports remain available under Comparison Reports.

Percentage of Students Proficient or Advanced Report Updates

For users who have access to LEA/District Teacher Summary reports, the 2022-23 reporting includes district-level download capability for the Percentage of Students Proficient or Advanced report. More information about this report is available in the PVAAS online Help.
